

GreenMAX® DRC Wireless Keypad Room Controller

Use with GreenMAX DRC Wireless System

Description

The GreenMAX® DRC Wireless Keypad Room Controllers are used as the brain of a system when Leviton Intellect™ or Lumina™ RF devices are intended to be used with a GreenMAX DRC Wireless networked control system. The Room Controllers combine both familiar push button control and energy management business logic with no extra wires. The GreenMAX DRC Room Controllers manage a room by coordinating activities of all devices within the space.

Leviton Antimicrobial Color Change Kits (CKDAK) feature antimicrobial treated plastic to help keep its surfaces cleaner and prevent microorganisms from degrading the product. This product contains an antimicrobial agent to inhibit the growth of mold, mildew, fungus and odor-causing bacteria that cause discoloration, staining, deterioration or corrosion on the surface of the device in between normal cleanings.

The GreenMAX DRC Room Control System offers a fully distributed room control system, with each room operating independently of others; no dependence on network processors or centralized controllers.

This revolutionary system is fully configurable via the GreenMAX DRC App for smart devices, and can be used to comply with IECC, ASHRAE 90.1, and 2025 Title 24, Part 6 occupancy/vacancy sensing, multi-level lighting, daylight harvesting, partial-ON, partial-OFF, exterior lighting, and receptacle control requirements, and is listed on the DesignLights Consortium® (DLC) Qualified Product List (QPL).

Smartphone Wireless App

Wirelessly commission, configure, control, monitor and provision the GreenMAX DRC system using the GreenMAX DRC App and an Android or iOS smart device.

Applications

- Room controller for GreenMAX DRC systems
- Intellect System Control
- Wireless Devices

Scheduler Features

Allows end users to create and add events and schedules to fit the lighting control needs of the space. Connect to any Room Controller in a space using an Android or iOS smart device and the GreenMAX DRC App. Add schedules and events to turn lights ON and OFF, dim lights, and enable and disable scenes.

- Schedules run on each Room Controller
- Each room controller can store up to (16) different schedules
- Each schedule can contain (32) events—an event contains the time an event will occur:
 - Specifies how the lights will change
 - Determines any behavior changes for the room

Features

- One Room Controller required per room
- Wireless interface for configuration, control and status monitoring
 - Two operating modes: access point for standalone operation, and Wi-Fi client for connecting to building network
- Use any Android or iOS for configuration using the GreenMAX DRC App at Leviton.com/apps
- Listed on the DesignLights Consortium® (DLC) Qualified Product List (QPL)
- Models include 1-, 2-, 4-, and 8-button configurations
- Wireless mesh network for connection to GreenMAX DRC, Intellect, and Leviton wireless devices
- Antimicrobial treated plastic helps keep the device clean
- Acting as a room controller, these devices implement energy management business logic for the controlled space

Features, cont’d

- Non-volatile memory allow Scheduler to work through power outages
 - Status LED for each button
 - Custom engraved labeling available on switch buttons and screwless wall plates
 - 1, 2, 4 button: up to 8 characters per two lines of text
 - 8 button: up to 4 characters per one line of text
 - Available in White with Color Change Kits available for Ivory, Light Almond, Gray, Black, and Red
- Mounts in a standard depth wall box. All switches can be installed in a multi-gang application. The multi-gang wallplate is sold separately.
 - Can be used to comply with IECC, ASHRAE 90.1 and 2025 Title 24, Part 6 occupancy/vacancy sensing, 0-10V dimming, daylight harvesting, partial- ON, partial-OFF, scheduling, demand response, and receptacle control requirements

Dimensions

	1,2,4,8 Button Switches
A	1.65" (42.06mm)
B	4.60" (117.07mm)
C	2.75" (69.85mm)
D	0.37" (9.55mm)
E	1.16" (29.51mm)
F	2.68" (68.25mm)

Wiring Diagram

Specifications

Electrical	
Input Power	120-277VAC, 50/60HZ, 30mA
Connectivity	
Intellect/Wireless	2.4 GHz wireless mesh network Up to 75' between Intellect and Wireless devices, mesh network—all devices are repeaters
Wi-Fi	Wi-Fi for local configuration or connection to building network
Environmental	
Ambient Temperature Range	32° to 122°F (0° to 50°C)
Ambient Humidity	0-90% non-condensing
Other	
Listings	Listed on the DesignLights Consortium® (DLC) Qualified Product List (QPL)
Energy Codes	Can be used to comply with IECC, ASHRAE 90.1, and 2025 Title 24, Part 6 occupancy/vacancy sensing, multi-level lighting, daylight harvesting, partial-ON, partial-OFF, scheduling, exterior lighting, demand response, and receptacle control requirements
Warranty	5-year warranty
