

Wireless Load Control Devices

LU04P

LU107

LU20S

* Depending on manufacture date, pink wire may be gray

Description

Leviton Wireless Load Control Devices offers three models for 0-10V dimming, phase cut dimming and general purpose switching control including receptacle circuit control. The load control devices wirelessly communicate via a mesh network to a Lumina RF Wireless Keypad Room Controller. Requires use with Lumina™ RF Wireless Keypad Room Controllers.

Wireless 800W Phase Cut Dimming Power Pack (LU04P) allows for dimming of full phase loads

Wireless 10A 0-10V Dimming Power Pack (LU107) can be used to dim any 0-10V controlled load

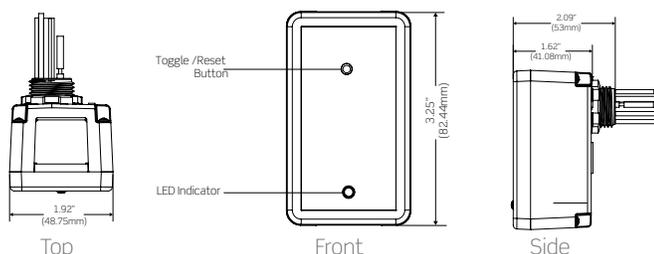

Wireless 20A ON/OFF Switching Power Pack (LU20S) is an ON/OFF relay that can be used for plug load control, motor loads, or non-dimming luminaires

All three load control devices are paired directly to a Lumina RF Wireless Room Controller for an advanced wireless lighting and room control system.

Features

- Wireless mesh network—self-healing mesh network has no hardwired backbone and connects all products together for a more robust and reliable wireless system
- Robust and reliable—mechanically held latching relay for high inrush (LED) and large commercial loads
- Compatible with multiple load types—LED, HID, inductive, fluorescent, etc.
- Integrated High Inrush Stability (H.I.S.) relay—designed to handle today's high inrush electronic ballast loads and offer unmatched durability and service
- LED status indicators
- Local toggle/test/program switch
- Complies with IEEE 802.15.4 standards—for domestic and international wireless networks
- Code compliant energy management functionality—can be used as a component in a system to meet energy code requirements for IECC, ASHRAE 90.1, and 2022 Title 24, Part 6 space/area control, dimming, manual-ON/OFF, occupancy/vacancy control and automatic shutoff requirements
