# Lumina™ RF Standalone Room Controls

**Simple energy saving wireless retrofits for inpatient rooms in healthcare facilities**

## The Lumina™ RF Standalone Room Control System delivers a scalable solution for code-compliant wireless lighting controls for inpatient rooms in healthcare facilities.

Lumina RF Standalone Room Controls deliver wireless control for any on/off, 0-10V and phase cut dimming application. This scalable wireless solution provides the flexibility to easily build a system to meet the unique lighting needs of any space.

Start with a Room Controller for simple switching, dimming and scene control. Then add additional components for multi-location control, occupancy/vacancy sensing, daylight harvesting and more. For additional convenience, the system is configured using the Lumina RF Standalone App—the only setup tool needed.

## CHALLENGE

*Healthcare facility wants to retrofit inpatient rooms lighting with a wireless solution and increase control capabilities.*

- Need for cost-effective LED retrofit with compatible controls
- Spaces require a combination of dimming, scene control, multiple daylighting zones and plug load control
- Must comply with IECC, ASHRAE 90.1 and 2019 Title 24, Part 6 requirements

## SOLUTION

*Lumina RF Room Controls create a simple energy and labor saving lighting retrofit solution.*

- Room Controllers and Load Control Devices add expanded wireless lighting control capabilities
- Lumina RF Standalone App provides easy configuration and commissioning
- Can be used to comply with IECC, ASHRAE 90.1 and 2019 Title 24, Part 6 space/area control, dimming, occupancy/vacancy sensing, automatic shutoff, multi-zone daylight harvesting and receptacle control requirements
