

Lumina™ RF Standalone Room Controls

Simple energy saving wireless retrofits for open office spaces

The Lumina™ RF Standalone Room Control System delivers a scalable solution for code-compliant wireless lighting controls for open office spaces.

Lumina RF Standalone Room Controls deliver wireless control for any on/off, 0-10V and phase cut dimming application. This scalable wireless solution provides the flexibility to easily build a system to meet the unique lighting needs of any space.

Start with a Room Controller for simple switching, dimming and scene control. Then add additional components for multi-location control, occupancy/vacancy sensing, daylight harvesting and more. For additional convenience, the system is configured using the Lumina RF Standalone App—the only setup tool needed.
