# LEVITON®

TOP 10 REASONS LEVITON IS A
WORLD-CLASS
FIBER OPTIC
MANUFACTURER

1. Globally available OPT-X™ end-to-end fiber systems offer agility to meet specific network demands while ensuring migration options for future bandwidth growth

2. Vertically integrated manufacturer of bulk cable and assemblies, with dedicated make-to-order facilities producing high quality pre-terminated solutions in plenum, riser, and CPR-rated LSZH fiber cabling

3. Industry leading attenuation performance, with some of the smallest and lightest fiber cable available for greater space efficiency and easier handling

4. Product is supplied with test results and labeled with unique serial numbers detailing date of manufacture for complete traceability

5. High precision laser cleaving technology for all single and multi-fiber connectors, and 100% factory testing of all pre-terminated fiber assemblies

6. Fiber infrastructure specifically designed for hyperscale data centers and AI computing clusters, with ability to scale to support large network deployments

7. Consistently providing innovative solutions, such as the first 24-fiber multimode and single-mode MPO systems for migration up to 800 Gb/s and beyond

8. Pioneers of flame rated indoor/outdoor ADVENTUM™ cable using innovative dry water-blocked cable cores, eliminating the need for transition point terminations at building entry and offering greater flexibility in deployment

9. Comprehensive enterprise fiber system solutions available for simplified maintenance, easier field termination, and splicing

10. Leviton Network Solutions is carbon neutral and has reduced its carbon emissions by 55% since 2021
