SureSlide[®] LED Dimmer with Neutral Wire

Perfect For New Construction

The NEW Leviton SureSlide LED Dimmer with Neutral Wire (Cat. No. 6674N) has all the exciting features you and your customers expect from Leviton dimming solutions. Plus, we have added a neutral wire to support superior dimming range and performance with today's LED bulbs and fixtures, making this dimmer a cost-effective option for new construction where a neutral wire is required by code.

The device is compatible with 150W LED, 300W incandescent/halogen loads and can be used for single pole or 3-way installations. It is California Title 24 Part 6, IECC Energy Code, and SSL7A Compliant.

Outstanding features include:

- **CONVENIENT** – An easy way to create a big impact for a minimal cost and customize the light level in any room, for any occasion
- **EASY TO INSTALL** – Slim profile for easier installation. Neutral wire required for installation

- **CUSTOMIZEABLE** – Adjustable settings to help improve LED dimming performance and maximize energy savings
- **VERSATILE** – Residents can control the lights from two locations using the SureSlide LED Dimmer with Neutral in the main location and a 3-way switch in the second location

Leviton innovation makes it easy for you to provide your customers the best NEC® compliant lighting control options for a comfortable and functional home environment.
